Daily mart is an e-commerce website where user can log in, view categorized products, and make purchases. It is developed by using Django framework and User can add review for each products and also add to cart

Technologies: HTML, CSS, Js,Bootstrap,Python, Django, SQL

🔗 https://github.com/josephppofficial/project.git

REALISTIC 3D ARCHITECTURAL DESIGN (Python-Django)

Developed a realistic 3D architectural design system for construction projects using Python-Django with MySQL database support. This project enables efficient design planning and enhances visualization for building construction.

ONLINE CRIME REPORTING (Php)

This website allows users to register crime complaints online. It is designed for people who are afraid or unable to visit a police station to report personal legal issues. Users can submit their complaints online and upload images or videos of crime scenes, enabling the police to take prompt action.
